B.lux

The essence of our land and its traditions

We work from an enclave located in the heart of nature,
where we combine innovation and tradition with an
offer that fuses technology with the best artwork.
We are deeply rooted in our environment. We are
heirs to the traditional values of our land and to the
best of its industrial character, such as commitment
and satisfaction in the face of a job well done.

Commitment to what is natural

Our environment has given us everything and, to preserve this tremendous asset, we comply with the highest standards of production control and waste management. Ninety per cent of the raw materials we use are of Spanish origin and we use wood from controlled forests that meet the sustainability criteria established by the PEFC. This is just a small example of the many measures that we have taken to raise B.lux to the level of an industry with a present and future committed to nature.

Control, trust and effort

Our products are distributed in 65 countries on five continents.

This outstanding international presence is possible thanks to the rigorous control of the manufacturing and distribution processes to which we subject our luminaires, allowing them to meet and exceed the most demanding quality standards.

We are committed to long-lasting relationships based on trust between manufacturer and customer. Our success is based on a slow growth, sustained over time, which advances with secure steps. There are no secrets – this is the natural result of our team's dedication and talent focused on offering the best service.

#berespectful

As part of our Corporate Social Responsibility (CSR) policy, we have developed a comprehensive plan that establishes and fosters our key targets for sustainable development.

#berespectful embodies our commitment to the environment, innovation, the social and economic scene and product quality.

1. Our products are made with recycled material and are recyclable.
2. We participate in the circular economy producing products that have a long life.
3. 100% of our electrical consumption comes from renewable sources.
4. Day after day, we fight to reduce our carbon footprint. This is why we implement policies to keep waste to a minimum, recycle and use recycled materials.
5. We promote innovation and incorporate technological advances in order to grow and help our community grow as well.
6. We support the local industry. Our suppliers are European and many of them live in our region.
7. Our company ethics are to work for the right to progress, workplace security, and for the equality of opportunities for men and women.
8. We carry our activities and alliances with like-minded organizations.
9. We work towards a more human, eco-friendly and sustainable future.

Designers

Collaboration with top external designers has always been a cornerstone of our trajectory and growth. This strategy, which is widespread today, was not so common in the early 80s, when we embarked on our first collaborative experience with Guillermo Capdevilla, who designed the successful B.lux System. Since then, we have focused on channelling the creative wealth of established professionals and talented up-and-coming designers with a view to offering a coherent, innovative and up-to-the-minute product range.

Suspension
lamps

Japanese-inspired single or multiple suspension lamp, all of them created around a disc that houses the light source (E26). This disc is available in a walnut or painted matte black finish, which supports the textured blown-glass diffuser that comes in an opal matte white finish. The single-unit suspension lamps have one glass diffuser and are available in three sizes (S15, S25 and S35). The multiple-unit lamps allow for different configurations, since the customer can choose to set them up with two glass diffusers (S2 Glass) or three (S3 Glass). Black textile cable.

Suspension
lamps

Suspension lamp system available with different sizes of shade. The S shade is made in copper or brass and available in solid copper or brass finishes, both with a shiny exterior and a satin interior. It is also sold in a textured matte black or white exterior, combined with a shade interior in satin brass or copper. M and L shades are made in aluminum and available in solid textured white or matte black. The Speers single and the multiple fixture lamps (S2, S3, S4, S5 and S6) are available in a surface version and the canopies are always white or black. Speers lamps are equipped with a high-luminance LED light source. They include a glass lens that focuses the light and enhances its luminous efficiency. There is an optional opal diffuser providing general diffused lighting.

Lighting
systems

Adjustable modular suspension LED system that allows for multiple arrangements. Marketed in two standard formats: Kup 1 and Kup 2. Each lamp consists of five adjustable light bodies offering direct light. The structure of the Kup lamp features a black finish, while the light bodies are offered in black, gold and copper finishes. The diffusers are made from acrylic and have a white opal matte finish. Additional modules can be supplied, consisting of one structure and two heads, thus increasing the dimensions of the lamp to better adapt to the available surface area and space. This module can be plugged into any of the end caps on the standard lamps (Kup 1 and Kup 2).

Anvil System

by
David Abad

Architectural
lighting

A surface-mounted or suspension lighting system made of extruded aluminum. Installable with continuous LED light modules with an opal diffuser (LED Line), or LED modules featuring four or two spots (LED Module), or LED spotlights (LED Spotlight and Spot S) available with anti-glare rings and beehive design. It also allows the installation of slim LED spotlights (LED Spotlight Slim). As a new feature, the Anvil System also allows the addition of round opal white glass diffusers that can be fixed to the rail (Sphere C) or hung (Sphere S). The Anvil System profile is available in matte white, matte black, natural oak and natural walnut.

**Architectural
lighting**

Collection composed of a suspension (S), ceiling (C), and two wall (W and ARM) versions. Made of aluminum, they feature an opal polycarbonate diffuser and emit direct (1L) or indirect (1L) light, or both (2L), except for the Marc C (1L). The entire collection is available in different finishes: matte grey, satin white, satin black, and oak laminate.

Frame

by
Mario Ruiz

**Outdoor
lighting**

An outdoor low level feature luminaire in the shape of a hollow rectangular prism with rounded edges. The structure is made from aluminum and the diffuser is made from pressed glass. This light fitting will intensely illuminate the interior hollow and softly and asymmetrically illuminate the surrounding area. Frame is available in three different sizes: S, M and L. Finishes: Satin white, texturised bronze, forged grey, corten-finish.

Speers Outdoor

by
David Abad

Outdoor
lighting

Outdoor lighting system consisting of one or more LED light sources with a solid black or white matte finish that can be installed with different accessories to yield various applications. F Accessory can be used to create a portable floor lamp with a 2.5-metre cable. This accessory also features a cylindrical concrete base and a matte black metal bar where up to three heads can be installed. Speers Outdoor can also be installed as a ceiling (C Accessory), wall (W Accessory), and angled wall (Angle Accessory) lamp thanks to the matte black metal bars that measure 120 and 150 cm long. These accessories can be combined to create custom layouts in any outdoor area.

Speers Outdoor W1 / Bollard

by
David Abad

Outdoor
lighting

Outdoor LED lamps available for wall (Speers Outdoor W1) or bollard (Speers Outdoor Bollard). The wall lamp gives adjustable direct light and is sold in solid matte white and matte black. The bollard model is made in metal with a matte black finish. Both the wall and bollard models are equipped with a LED light source with a glass lens that focuses the light and enhances its luminous efficiency.

CASAMBI B.lux powered by Casambi App

The Casambi app works as one of the user interfaces in a Casambi lighting control solution, as the commissioning tool and as well as a remote gateway. The Casambi app works with iOS as well as Android devices, like smartphones, tablets and smartwatches. The app is free to download by any end-user.

The Casambi app is made by user interface experts and in a way, that anyone – regardless of technical proficiency – can use it. The Casambi lighting control technology gives a possibility for Casambi's partners to implement and develop anything needed for a full-featured lighting control system, but the Casambi app only shows in the user interface the functionality that is relevant to that particular installation. Therefore, the Casambi app is equally well suitable for the professional lighting market as well as the residential field.
