Lee Broom is one of the UK's leading product designers and a premium global design brand. With his highly original brand of luxury furniture and lighting designs, his work is recognised and retailed across the globe. Since founding the company in 2007, he has created over 100 furniture, accessory and lighting pieces, all of which are designed, manufactured and retailed under the Lee Broom brand. He has also collaborated with many other leading global brands including Christian Louboutin, Mulberry, Bergdorf Goodman and Wedgwood.

Lee Broom's designs can be seen in hotels, restaurants and homes across the world as well as on magazine covers and in newspapers internationally. His designs are both unique yet familiar as he takes classic styles and reinterprets them in new and contemporary ways with an unexpected edge.

Taking inspiration from his background in fashion design, he strives to embrace and explore new themes while keeping an overarching house style. Using the highest quality materials, combined with the latest technology, Lee Broom constantly evolves and innovates, resulting in his signature mix of classicism and modernity.

Having started out in theatre school, a beginning which has greatly influenced the sense of drama and narrative that his collections create, his career took a change of direction after he won a fashion design competition at the age of 17. This led him to meet and then go on to work for the legendary designer Vivienne Westwood, after which he studied for a degree in fashion design at Central St Martins. Fashion is still a great source of inspiration and The Guardian commented, "Lee Broom is to furniture what Marc Jacobs or Tom Ford are to fashion."

Lee Broom has won over 30 awards to date including the prestigious British Designer of the Year Award and The Queen's Award for Enterprise presented by Her Majesty The Queen at Buckingham Palace.

Presenting his collections each year in Milan, New York and London Design Weeks, he has gained a reputation for creating conceptual dynamic installations which are surreal, experiential and always unexpected.

Making design a successful global business Lee Broom's products are retailed in over 250 stores in 50 countries around the world alongside his own flagship showrooms in London and New York.

## LIGHTING

## AURORA

A chandelier of multiple adaptations which projects layers of ethereal rings of light created from linear LED light bulbs. Created and produced by Lee Broom, the hand blown glass bulbs contain a perpendicular LED filament which refracts against the vertical lines of the reeded glass. En masse and reflecting in the mirror-polished stainless steel rings, the overall effect ensues a glowing aura.

Aurora is a scalable chandelier in which rings ranging from a 32cm to a 109cm diameter can be installed individually or connected together to create a tailored chandelier.

## ECLIPSE

Eclipse is a lighting collection in both its name and inspiration. Mirror-polished stainless steel and acrylic discs interact, dissect and obscure, which both eclipses and reveals its illumination to the viewer at the same time. Available as a single pendant light, chandelier and table lamp, Eclipse has a sculptural silhouette with a mobile-like quality that changes at every angle. Finished in polished chrome or polished gold, Eclipse acts as a mirror, reflecting and refracting light and featuring LED lighting systems custom-designed and developed by Lee Broom. Using the refractive properties of an etched 10mm solid acrylic core and concealed LED technology to create a diffused halo, the design highlights Lee Broom's technical craftsmanship and innovation.

## ORION

Orion comprises modular lights with opposing opaque and solid polished gold or gunmetal spheres along with opaque and solid polished gold or gunmetal tubes. Individually, these can be hung horizontally or vertically and when used in multiples create bespoke constellations of light with infinite adaptations. The lights are technically innovative with concealed LEDs that create a warm glow reflecting against the polished globes and tubes. The celestial-inspired collection has been designed around sculptural and spherical forms, which are both conceptual yet elegant.

## LENS FLAIR

Inspired by telescopic lenses and the technique of horizontal and vertical refractions, Lens Flair is a product comprising two halves, seamlessly combining the solid and the transparent. A detailed cross-cut lens emits a soft deflected light, which is juxtaposed by a contemporary solid casing in brushed brass or matte black finishes. This striking new piece is available as a Pendant Light and Table Lamp. Lens Flair makes a bold statement by itself, or multiple pendants can be hung to create a more impactful installation.

## LITTLE LENS FLAIR

At 20cm ( 7 7/8 in), Little Lens Flair is a scaled-down new adaptation of the popular Lens Flair collection. Inspired by telescopic lenses and the art of horizontal and vertical refractions, Little Lens Flair is a piece of two halves, seamlessly combining the solid and the transparent. A detailed cross-cut lens emits a soft deflected light, which is juxtaposed by contemporary solid casing in brushed brass or matte black finishes. The beautiful adaptable piece is available as a Pendant Light, Table Lamp and Chandelier.

## CRESCENT

A new twist on the classic globe light, Crescent Light is an illuminated sphere sliced asymmetrically in half to reveal a crescent-shaped brushed brass fascia. At 40cm / 15 ¾ inch diameter and containing a high power LED bulb, Crescent Light has presence and luminosity, seamlessly combining the solid and the opaque. Also available is the Crescent Table Lamp, nestling the sliced sphere on a ring of brushed brass.

## MINI CRESCENT

A miniature version of the Crescent Light, Mini Crescent is a 20cm / 7 7/8" in sphere sliced asymmetrically in half to reveal a crescent-shaped brushed brass fascia. Further options available include Mini Crescent Chandeliers, composed of three or five pendants hung from a brushed brass canopy and the Mini Crescent Ceiling Light, which allows the shade to be mounted directly on the ceiling. Completing the family is the Mini Crescent Table Lamp.

## FULCRUM LIGHT

Designed from the exploration of pivots and supports, Fulcrum Light is a slimline and elegant pendant of polished gold, polished chrome or matte black cylinders suspended around a central sphere. The exposed light bulb symmetrically mimics the silhouette of the sphere. The Fulcrum is also available as a three piece chandelier and five piece chandelier with matching finish canopy.

## CAROUSEL

Inspired by the merry-go-round ride of a traditional fairground, Carousel is a pendant light with a heavyweight presence that floats gently in space. Cylinders of polished gunmetal, polished gold, polished chrome or matte black, each house an inset LED lighting element resulting in a spectacular yet playful ring of light. Carousel is 60cm / 23 5/8 inches featuring 30 LED light bulbs. Carousel XL is 120cm / 47 1/4 inches and features 60 LED light bulbs. Both are suspended from a matching circular canopy by steel tensile wires.

## CHAMBER

Housing a sculptural Carrara marble diffuser within a lead crystal vessel, Chamber expresses the unexpected translucent qualities of marble in a compelling decorative pendant. With its gentle luminosity and directional downlight, Chamber is available in two sizes and lends itself to being hung in clusters as well as individually. Also available as a three piece chandelier and five piece chandelier with satin white canopy.

## TUBE

Skillfully milled from a single piece of Carrara marble and finished at each end with bands of brushed brass or polished chrome, Tube contains a strip of LED light source resulting in what appears to be a solid length of warm glowing stone. The unique veins of each piece of marble means no two lights are exactly the same. A handcrafted twist on the traditional fluorescent tube light. Also available as a wall mounted light.

## CRYSTAL TUBE

Composed of a decoratively patterned length of hand-cut glass capped at each end with brushed brass or polished chrome, Crystal Tube contains a slender LED light source resulting in a sparkling beam of light. A luxurious reimagining of the standard fluorescent tube light, Crystal Tube is suspended from both ends by a thin steel tensile wire allowing it to be hung horizontally. Also available as a wall mounted light.

## CRYSTAL BULB

Taking inspiration from the delicate craftsmanship of crystal cutting, Crystal Bulb combines industrial influences with decorative qualities, transforming the everyday light bulb into a beautiful ornamental light fitting. Each Crystal Bulb is handcrafted using traditional techniques and hand cut with a classic crystal pattern inspired by traditional whiskey glasses and decanters. Crystal Bulb is available in a Clear or Frosted finish and the collection includes a brushed brass or polished chrome pendant, polished gold table lamp, three piece chandelier and five piece chandelier. Crystal Bulb is also available as a brushed brass wall light and ceiling light. The Crystal Bulb features a warm white LED, which is replaceable.

## DECANTERLIGHT

Crafted from hand cut crystal, Decanterlights are inspired by the vintage drinks decanters found in a traditional British drawing room. Referencing three classic decanter shapes, the Square, Bell and Tulip pendants produce a warm, welcoming glow and refracted light casts intricate shadows on surrounding surfaces. A five-piece and three-piece chandelier suspends a selected mix of shades at different heights to create a stunning lighting centerpiece. Decanterlights are also available in a straight cut version, using the same decanter vessels with a vertical cut pattern to add a modern twist.

## ACID MARBLE

A layer of white Carrara marble and acid yellow tinted optical acrylic are sandwiched together to form an illuminated circular diffuser for the sculptural Acid Marble Table Lamp. Set into a solid Nero Marquina marble base, the veins of the Carrara marble are visible through the optical disc allowing the marble to appear yellow, giving this very classic material a playful twist.

## FURNITURE

## HANGING HOOP CHAIR

Suspended by a chain, two circular steel hoops join to create Hanging Hoop Chair, a modern swing chair with an iconic outline. The angled inner hoop supports a padded backrest that is perfectly aligned with the hemispherical seat, both of which are upholstered in Kvadrat wool. The frame is available in matte black and brushed brass plated finishes.

## SHADOW CABINET

The Shadow Cabinet is a hand made contemporary piece playing with the concept of optical illusion with traditional crafted materials. A series of triangular facets run vertically down the front of the cabinet with one side in American walnut and the other in brushed brass. From one angle the Shadow pieces appear to be all wood and from the other all brass. Sitting under a solid piece of brushed brass, the cupboards of the Shadow Cabinet are cleverly disguised within the vertical geometry.

## TIME MACHINE

Time Machine is an exclusive statuesque marble grandfather clock measuring 168.5cm / 66 3/4 inches high. Hand-crafted from Carrara marble, the monolithic and commanding structure features a traditional engineered clock mechanism with solid brass pendulum, weight and hands. Limited to an edition of 10.

## SPLIT MIRROR

A precision cut mirror slice, shifted from its original position, reveals an oak trimmed section of the black frame on Split Mirror. This modern wall mirror has a distinct personality. Both the round and long variations of Split Mirror have been lacquered in a matte black finish to compliment the oak trim.

## ACCESSORIES

## WEDGWOOD BY LEE BROOM

A prestige capsule collection of limited edition hand-crafted Jasperware vases and bowls, the Wedgwood by Lee Broom collection is a true showcase of craftsmanship and design. With silhouettes and archetypal designs taken from Wedgwood's 250-year old archive, ornate detailing has been stripped back and the traditional Jasperware finish juxtaposed with postmodern elements to produce thoroughly cutting-edge versions of timeless classics limited to 15 editions of each of the four designs.

## PODIUM

Podium is a vase, which plays with the sculptural quality of balance. Combining solid marble with transparent glass, it brings together opposing materials to create playful yet elegant pieces. The glass globe vessel is interchangeable between the round Carrara marble and square Nero Marquina marble bases, allowing the components to be selected in any combination desired. Podium creates an impact whether filled with displays of flowers or left empty as a decorative element of beautiful materiality.

## FULCRUM CANDLESTICK

Fulcrum is a sculptural and monolithic candlestick whose cylindrical stem appears to balance on a central sphere. Containing a large tea light, Fulcrum Candlestick is available in solid optical crystal, white Carrara marble or black Nero Marquina marble. The small Fulcrum candlestick is 31cm / 12 ¼ inches tall and the large size is 40cm / 15 ¾ inches.

## ON THE ROCK

On The Rock combines delicate crystal with solid Carrara marble to form a glassware collection for the modern table. Elegant crystal vessels are fused to the marble bases creating a champagne coupe, wine glass and martini glass of contrasting but complementary materials.

## HALF CUT

Half Cut cleverly repurposes crystal decanter stoppers as the bases of a stunning collection of champagne coupes and wine glasses. Crystal vessels are mounted on four distinctive, hand-cut stopper designs to allow the option of matching or mixed sets.

## PRODUCT DETAILS

AURORA RING 1 (20)

Reeded hand-blown glass bulbs & polished stainless steel ring with polished stainless steel drop rod & canopy.

12 1/2 in / 32cm

12 in / 30.5cm

DROP HEIGHT\*\*

220-240v

**Illumination:**

80w, 2700k, max 20 x 4w LED, dimmable 20 - 100%

**Bulb:**

GU18, 4w LED, 210 lumen, 15,000 hrs, 20 x supplied

**Suspension:**

Polished stainless steel rod, Dia 1.6cm x L 50cm\*\*

Ceiling Plate: H 6.5cm x Dia 14cm

Product weight (net): 6 kg

Certification: CE and CB

110-130v

**Illumination:**

80w, 2700k, max 20 x 4w LED

**Bulb:**

GU18, 4w LED, 210 lumen, 15,000 hrs, 20 x supplied

**Suspension:**

Polished stainless steel rod, Dia 3/8 in x L 19 3/8 in\*\*

Canopy: H 2 1/2 in x Dia 5 1/2 in

Product weight (net): 13.3 lbs

Certification: UL and cUL

AURORA RING 3 (45)

Reeded hand-blown glass bulbs & polished stainless steel ring with polished stainless steel drop rod & canopy.

AURORA TIERED CHANDELIERS

Reeded hand-blown glass bulbs & polished stainless steel ring with polished stainless steel drop rod & canopy.

2 Tier Chandelier

3 Tier Chandelier

4 Tier Chandelier

Aurora can be customised to create tiered chandeliers by connecting together any of the five Aurora Rings listed above.

Pictured (above far left):

Aurora 3 Tier Chandelier - consisting of one Aurora Ring 3 (45) and two Aurora Ring 2 (32).

Please contact your sales representative for more information and a custom quotation.

\*\* Supplied with 50cm (19 1/8 in) length rod as standard, giving overall drop height of 75.25cm (29 1/2 in) from ceiling to underside of bulb (single Aurora Ring). The rod length can be adjusted in increments of 16cm (6 1/4 in), 50cm (19 1/8 in) & 100cm (39 1/4 in) or a combination of. The overall drop height will change accordingly.

ECLIPSE PENDANT LIGHT POLISHED GOLD

Opal acrylic & polished gold with transparent cord, steel tensile wire and polished gold canopy.

9 7/8 in / 25cm

9 7/8 in / 25cm

15 in / 38cm
