Elevating the human experience
through lighting design

"We help architects and interior design professionals transform environments and reach beyond the ordinary through lighting design"

Our search for new and unique designs is never ending. We are passionate about design, but also about making it easy to specify and source lighting.

We adapt every product to American electrical standards. Each collection has been carefully curated for the American contract/hospitality sector as well as for the high-end residential market.

Our product specifications are easily accessible, accurate and reliable. We provide professional specification support and assistance every step of the way.

Meet our Designers

We collaborate with some of the best designers worldwide. We believe in design inspired by innovation, diversity, sustainability, uniqueness and simplicity.

Ariel Zuckerman is an award-winning product designer with work featured in global exhibitions. Specializing in custom lighting, furniture, and consumer products, his studio collaborates on major commercial projects. Formerly at Keter Plastic, Ariel developed storage solutions for North America and Europe. His acclaimed collections include "Folded," "Knitted," and "Crumpled." Ariel also lectures on design at SCE College.

Born in 1973, **Hind Rabii** holds an industrial engineering degree from the Institut Supérieur Industriel in Verviers, Belgium. And so, with this her technical expertise and a passion for fashion and creativity, it seemed obvious that Hind would be drawn towards a career in design. It was while researching lighting for her own home that the designer Hind Rabii decided to commission some lighting pieces which met her standards of excellence, refinement and luxury.

Octavio Amado is an architect of light. He creates composable modules with strong visual identity able to bring well-being and sensations within different types of spaces. The key words for his designs are structure, assembly, lightness, translucence and geometry. With these factors he adapts his designs to different architectural needs.

Vito Selma is quite adamant on its focus on the natural. A love affair with shapes and textures that are often repeated in the earth, the sky and the sea. It is this love for nature that has driven the brand to constantly look for design components that satisfy its inclinations, while relying on wood as a primary medium.

Tuukka Halonen is a highly talented designer with over 15 years experience in commercial design environment. He studied at the Roayl College of Art in London and worked several years for Habitat and Tom Dixon's Design Office. In his recent works Tuukka has been influenced by traditional crafts employing wood in its various forms. He was awarded the Green Good Design Award from the Chicago Athenaeum for the Pilke and Havas.

Massimo Mussapi has a degree in architecture from the Milan Polytechnic, and in design from the IED, one of the most prestigious design institutes in Europe. His studio is in Milan, the world capital of Design, an inimitable network that connects industries, designers, cultural and academic institutions, publishing, trade fairs of international importance.

With a passion for design and an experience of more than 20 years, **Celia Gamboa Jiao** has since dabbled on several mediums with an objective of emanating logic, balance, honesty and purity in all her designs. Celia explored over-lapping numerous thin wires by using the spot welding machine. The result was a wire mesh that can tolerate a wide range of design requirements. With infinite possibilities and her love for this medium, Schema was born.

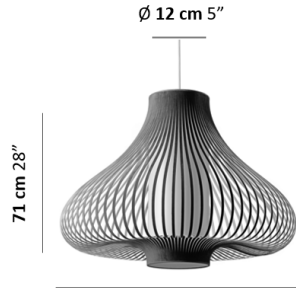

Stanley Ruiz is an industrial designer specializing in the development of products for the furniture, lighting, and home furnishings sector. With an extensive background in craft design and production, his work explores the commonplace to bring about new meaning and interpretation to object archetypes.

Uplight Group Essentials

The "Essentials" collection is the result of our continued search for unique lighting design. Produced by expert artisans in Spain, the collection is made of congruent strips of French Velvet covering a central cylindrical diffuser that conceals the light source. These pieces will add a touch of elegance and sophistication to any space.

Hind Rabii

For over 20 years, Hind Rabii, has been producing collections with a clearly established philosophy. The point of view combines the pure lines of Scandinavian design with inspiration drawn from Morocco, the designer's country of origin. Working with metal, glass from Murano and ceramics from around Venice, the Belgium-based manufacturer produces lighting that has been designed with clean lines and a pared-down elegance. Their products are sold in the finest showrooms around the world.

Pilke Lights

Pilke Lights is a unique lighting collection created by renowned Finnish product designers, including Tuukka Halonen and Harri Koskinen. In Finland, forests provide the country with the sustainable resources needed to produce plywood and cardboard products. As a result, the Pilke Light's team has developed into master woodworkers, crafting timeless fixtures without the use of glue or screws. Pilke Lights have won many prestigious design awards such as the Good Design and Green Good Design (Chicago) as well as Eco Design (Helsinki.)

Global Pendant Detail

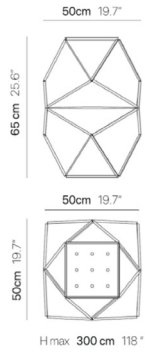

A modern living room interior. On the left, a large white sectional sofa is adorned with white and black pillows. Above it hangs a large framed abstract painting with black and white swirling patterns. In the center, a glass coffee table with a metal frame sits on a light-colored rug. To the right, a white armchair is positioned near large windows covered with red curtains. A striking red, sculptural chandelier hangs from the ceiling. The room is bright and minimalist, with white walls and a clean design.

Octavio Amado

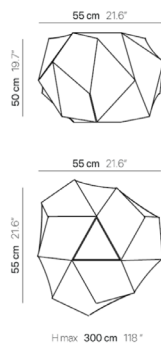

Octavio Amado is a contemporary design brand envisioning and manufacturing a wide range of lighting objects while actively developing custom designs for large hospitality projects. The key words for our designs are structure, assembly, lightness, translucence and geometry. With these different factors we adapt our designs to different architectural needs. This vocabulary presents itself in our small pieces as well as in our monumental installations.

Schema

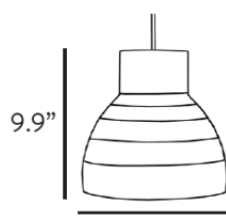

Galvanized iron the unifying element of all Schema products. The versatility of galvanized iron is what inspires our designers' innovative concepts. It is sturdy and rust resistant, having been plated with zinc to prevent corrosion. Softened by hands, this malleable medium allows our artisans to weave our beautiful, intricate pieces to life. This art of metal weaving is something we take pride in, coming from years of learning and mastering the craft. Because our items are not manufactured by machine, the result each time is a unique, hand-woven product that brings the artisan's personal touch into any living space.

Vito Selma

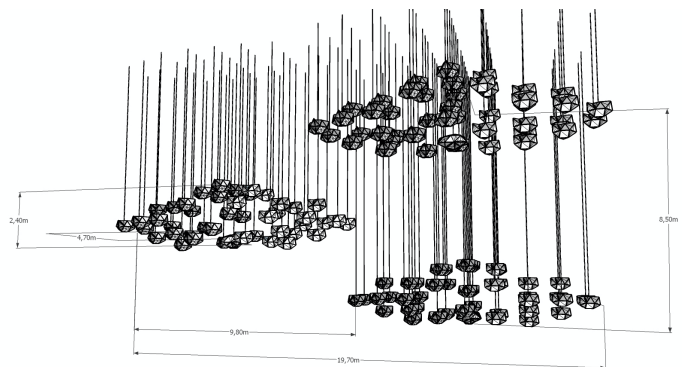

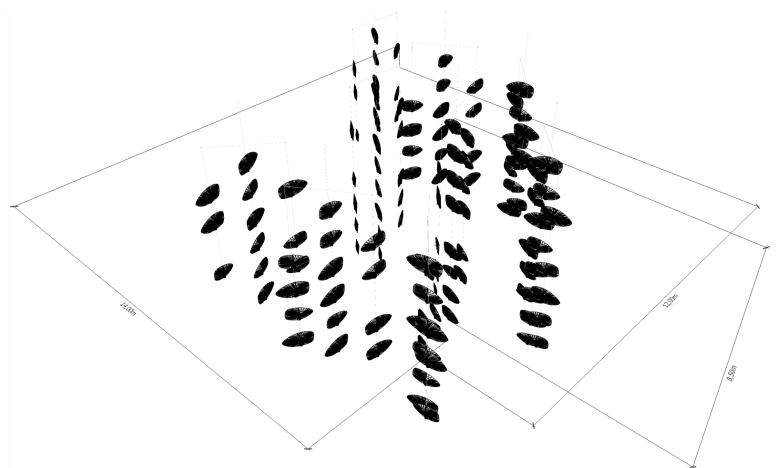

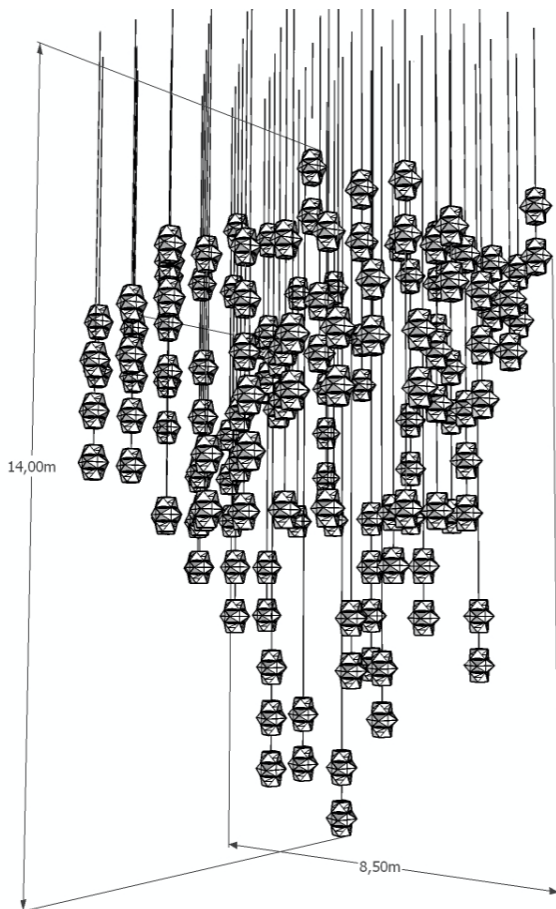

Though specific stimuli may shift from time to time, the Vito Selma brand is quite adamant on its focus on the natural. An examination of numerous inspirations reveal a love affair with shapes and textures that are often repeated in the earth, the sky and the sea. It is this love for nature that has driven the brand to constantly look for design components that satisfy its inclinations, while relying on wood as a primary medium. Considered as an enduring partner despite the brand's continuous evolution, wood and its many variations and reiterations, provides avenues for Vito Selma to experiment, create and explore. This exploration has allowed the brand not only to push the limits of the material, but also to examine the results of its marriage with other organic elements

Custom Made Lighting

Whether modifying an existing product or creating an entirely new fixture from scratch, Uplight Group is uniquely qualified to handle your project. Our team works closely with you to understand your vision and your project's unique success criteria. Before your fixture goes into production, you'll understand exactly what your fixture will look like, how much it will cost, and how long it will take to manufacture.
